Summary report on

“E-LEARNING” value-added course

E-learning plays a crucial role in advancing medical education, improving patient care, and driving innovation in the medical profession. It offers opportunities for continuous learning, collaboration, and professional development, ultimately contributing to better healthcare outcomes for patients worldwide. In remote or underserved areas, e-learning can serve as a vital tool for delivering medical education and training. Additionally, e-learning complements telemedicine initiatives by providing training on remote healthcare delivery and telehealth technologies. Through this course student will learn various aspects of e-learning in education, from pedagogical principles to technological considerations, and from instructional design to future trends. In the times of COVID pandemic importance of digital platforms for teaching-learning activities has enormously increased, thus mandating all professionals to improve their skills in e-learning activities to stay put in their fields.
