Credit Hours

Department of Pediatrics

Scope of the Program:

Over the recent years, Pediatric Emergency and Trauma Care has evolved into a critical pillar of child healthcare. With increasing trauma burden & emergency presentations in children, especially in resource-variable settings, it is essential to strengthen practical skills, preparedness, & system-based responses. Collaboration, shared learning, & skill enhancement remain key to addressing present and future pediatric emergency challenges.

The Pediatric Emergency & Advanced resuscitation learning - simulation based workshop focuses on mastering lifesaving skills through hands-on training, high-fidelity simulation, & evidence-based discussions led by national experts in Pediatric Emergency Medicine, trauma, critical care, & prehospital systems. The workshop will improve confidence & outcomes in pediatric emergencies.

As Pediatric Emergency Medicine continues to grow in India, it is our collective responsibility to ensure that every child receives timely, safe, and effective emergency care. This workshop serves as a step forward in reducing preventable morbidity and mortality and building a resilient, skilled, and mission-driven pediatric emergency workforce.
